

# Bioinformatics Center

Bioinformatics Center at University of Eastern Finland provides researchers and students with bioinformatics expertise and infrastructure services. Bioinformatics Center provides expertise in bioinformatics, data-analysis and data management. We manage high-end computational servers that enable us to provide a wide range of computational services for data management, high-performance scientific computing, web-hosting and software tools used in research and education. Bioinformatics Center also provides researchers and students with training and participates in teaching bioinformatics courses at UEF. This wiki gives practical information related to these matters.

If you require customized infrastructure or services, e.g. extended computational resources, data management, data-analysis, help with writing grant applications or other bioinformatics related expertise, please contact Bioinformatics Center!

## Apply access for server infrastructure

All UEF researchers and students can requests access to the server infrastructure. Please see more information about:

- [How to apply access and usage agreement terms.](#)
- [How to acknowledge and cite Bioinformatics Center.](#)

## Official website

Official website is maintained at University of Eastern Finland at Institute of Biomedicine [Bioinformatics Center](#).
